

Entering the job market - My one year preparation plan

My goal when I enter the job market is	
When I enter the job market, my goal is I want to be a back-end developer because I have learnt HTML, CSS, JavaScript, PHP and skill of research.	
My fears are	
I never enter the job market before and I have some fears such as anxiety because I feel I confuse syntaxes in programming languages. Moreover, I don't know clearly about how to prepare before, during and after interview about attitude when work in company.	
My solutions to reduce my fears are	
Internal solutions (Myself)	External solutions (PNC)
<ul style="list-style-type: none">- Try to study more- Research about job in IT- Optimism- Build network in class- Build confidence- Do something clearly- Respect time- Time management.	<ul style="list-style-type: none">- Build network with senior as alumni- Ask alumni for help like work and experience- Learn from people around me include soft skills and hard skill.

Calendar: Draw the timeline of your preparation!

Jan 24

Dec 24

Date	Planning
01/01/2024 – 05/04/2024	<ul style="list-style-type: none">• Learn about PHP in advance.• Learn English more by myself such as listening and reading about short story for 20 minutes at home every night.• Learn React JS by myself at the weekends.
